CARTA EN APOYO DE LOS CIENTÍFICOS MEXICANOS

El Congreso de México se encuentra discutiendo un proyecto de ley que, de aprobarse, eliminaría 109 fideicomisos públicos, incluidos los Fondos de Investigación Científica y Desarrollo Tecnológico del Consejo Nacional de Ciencia y Tecnología (CONACYT). Éste sería un duro golpe a la ciencia y la tecnología en México justo cuando más que nunca el país necesita de su aporte.

Los abajo firmantes pedimos a los señores legisladores que reconsideren su apoyo al proyecto para evitar la extinción de los fideicomisos, los cuales dan soporte económico a proyectos de investigación multianuales, y son pilar fundamental para el mantenimiento de infraestructura, equipo y tecnologías de la información de instituciones académicas de excelencia a nivel mundial.

Los Fondos de Investigación Científica y Desarrollo Tecnológico están constituidos en su mayoría de recursos que provienen de organismos privados, internacionales y multinacionales para fondear proyectos de investigación.

Si se suprimen los fideicomisos, se cerrarán las puertas a nuevas aportaciones económicas de este origen para apoyar investigaciones futuras en los Centros Públicos de Investigación.

Nos preocupa que se limitará considerablemente la colaboración con los colegas mexicanos, con

```
quienes compartimos intereses y proyectos de investigación.
